                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Ş
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           δ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Ś
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 7, Application US/09070844

Patent No. US20020062495A1

GENERAL INFORMATION:

APPLICANT: Schmidt, Robert R.

APPLICANT: Miller, Philip

TITLE OF INVENTION: NOVEL POLYPEPTIDES AND POLYNUCLEOTIDES

TITLE OF INVENTION: DEHYDROGENASES AND METHODS OF GLUTAMATE

TITLE OF INVENTION: DEHYDROGENASES AND METHODS OF USE

NUMBER OF SEQUENCES: 26
TYPE: nucleic acid
STRANDEDNESS: double
TOPOLOGY: linear
MOLECULE TYPE: cDNA

Sequence 23, Application US/09070844

Patent No. US20020062495A1

Patent No. US20020062495A1

PAPLICANT: Schmidt, Robert R.

APPLICANT: Schmidt, Robert R.

APPLICANT: Miller, Philip

TITLE OF INVENTION: RELATING TO THE '- ANI

TITLE OF INVENTION: DEHYDROGENASES AND ME:

NUMBER OF SEQUENCES: 26

CORRESPONDENCE ADDRESS:

ADDRESSEE: Saliwanchik & Saliwanchik

STREET: 2421 N.W. 41st Street, Suite A-:

COUNTRY: USA

ZIP: 32606
